

1. Use the **Windows key + I** keyboard shortcut to open the Settings app.
2. Click **Time & language**.

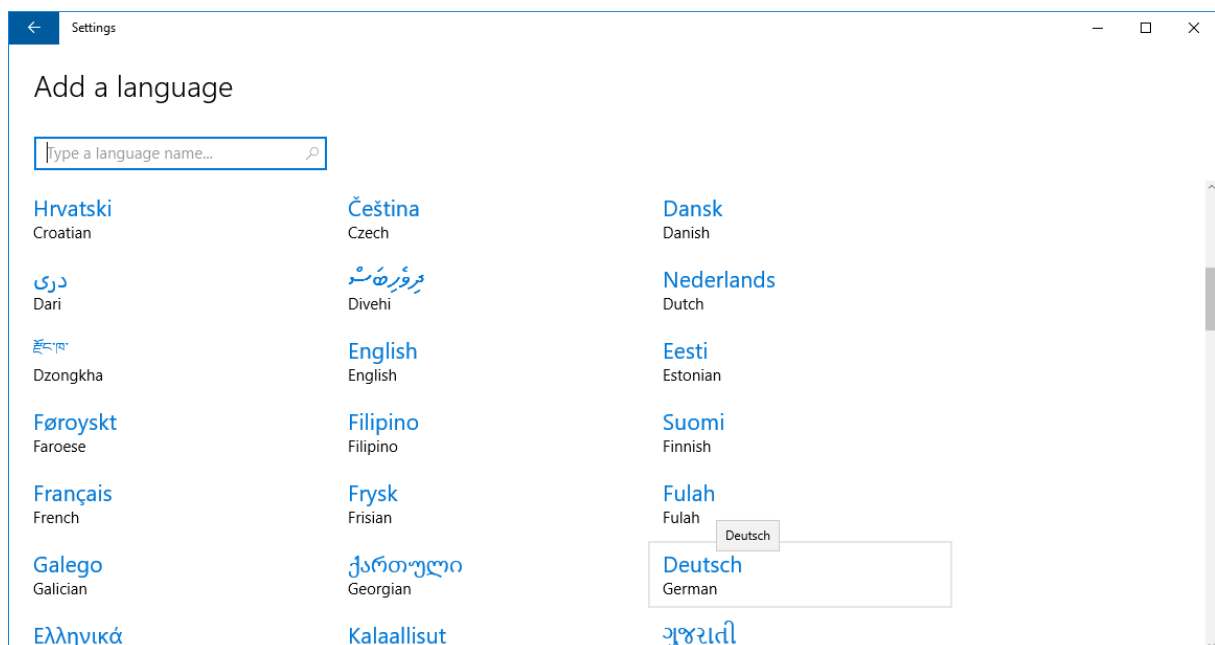

3. Click **Region & language**.

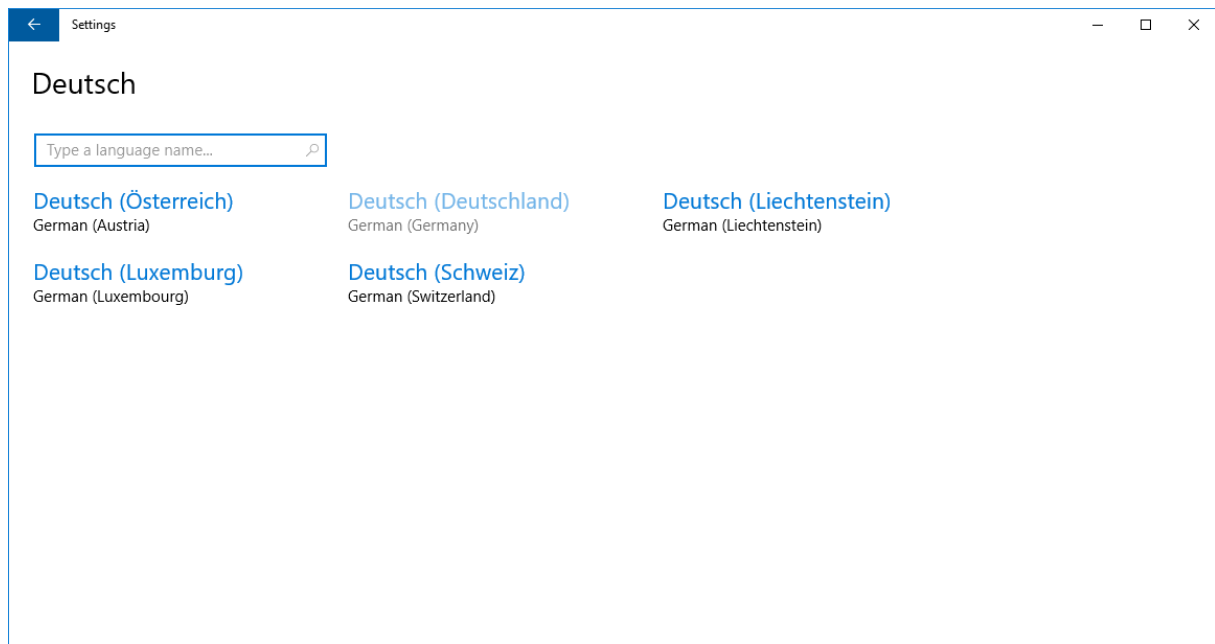

4. Under Languages, click **Add a language**.

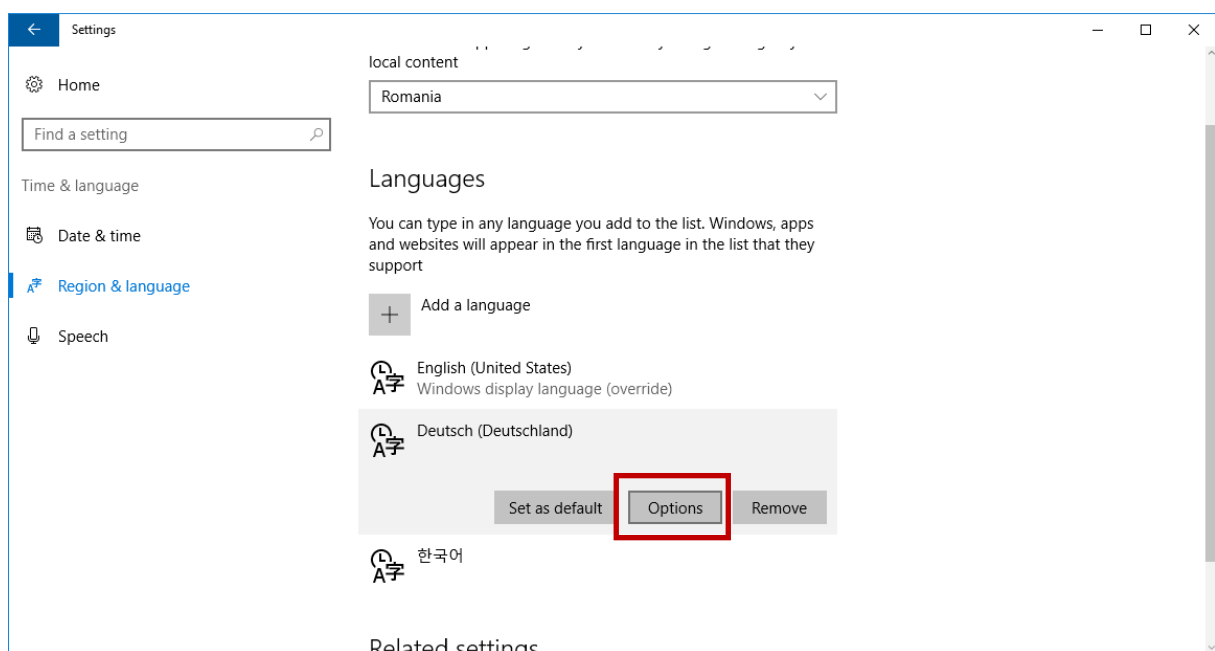

5. Click the language you want to add, and select the specific variation if applicable.

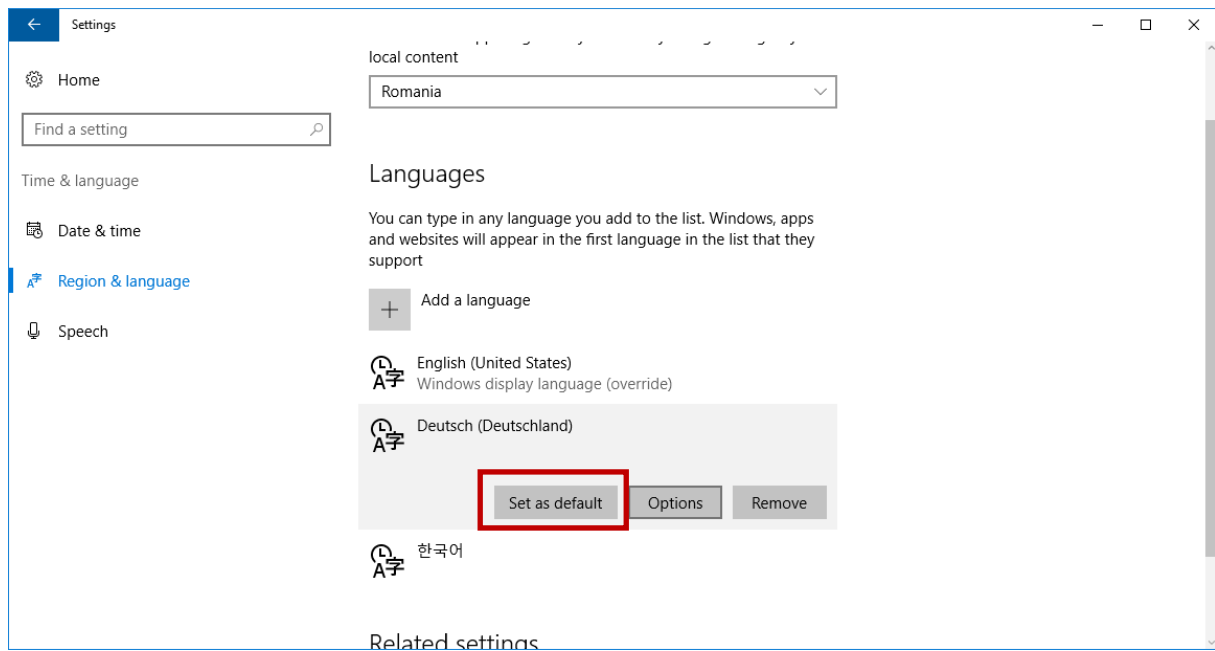

6. Select the new language and click **Option** (and download any the language packs as necessary).

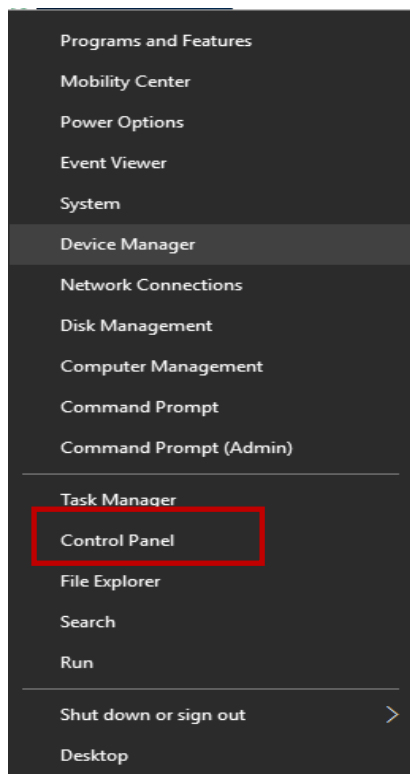

7. On Region & language, select the new language, and click **Set as default**.

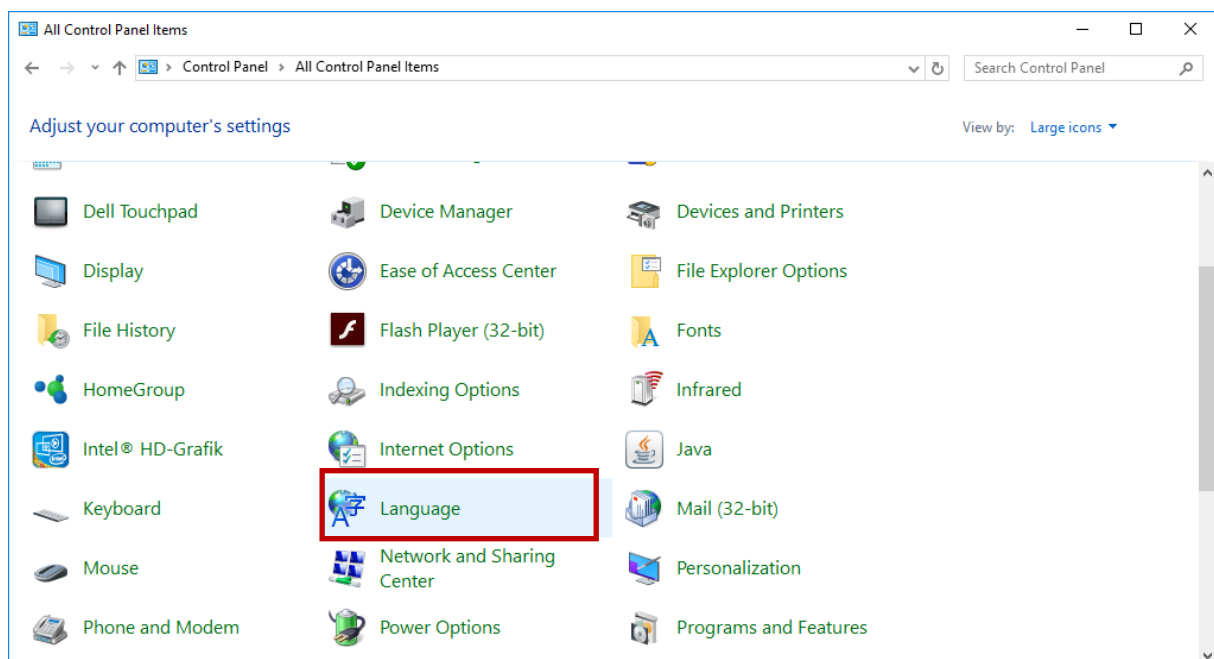

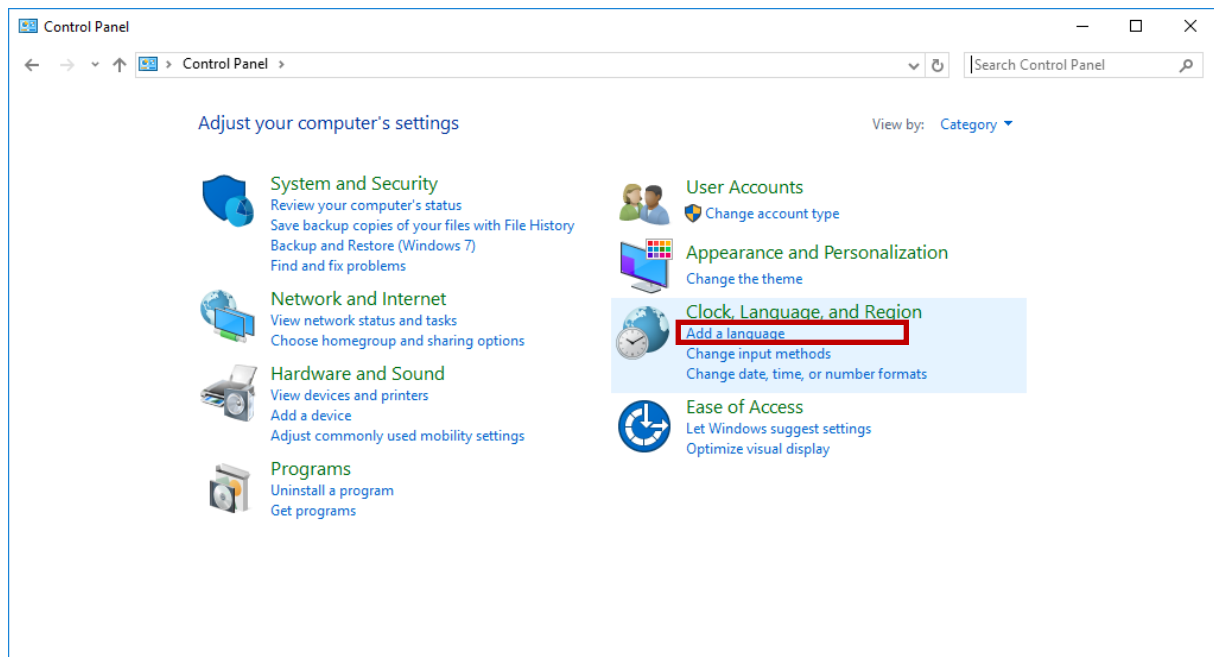

8. If applicable, under Country or region, select your location to enable the Windows 10 to give you local content.

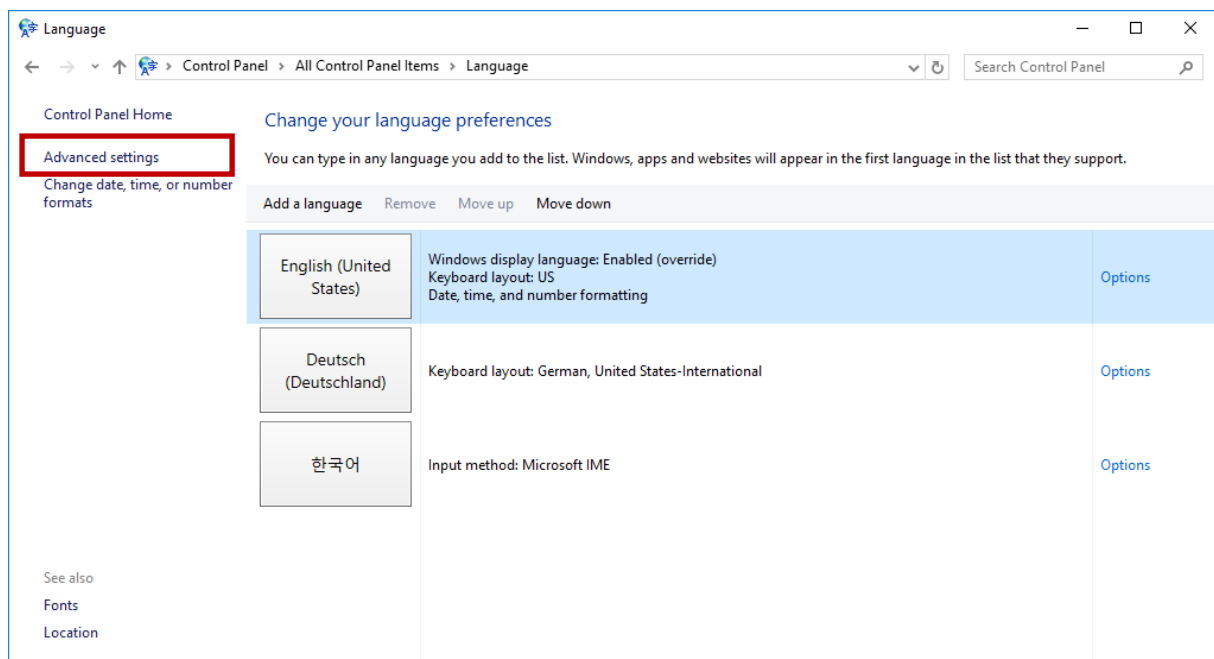

9. Use the **Windows key + X** keyboard shortcut to open the Power User menu and select **Control panel**.

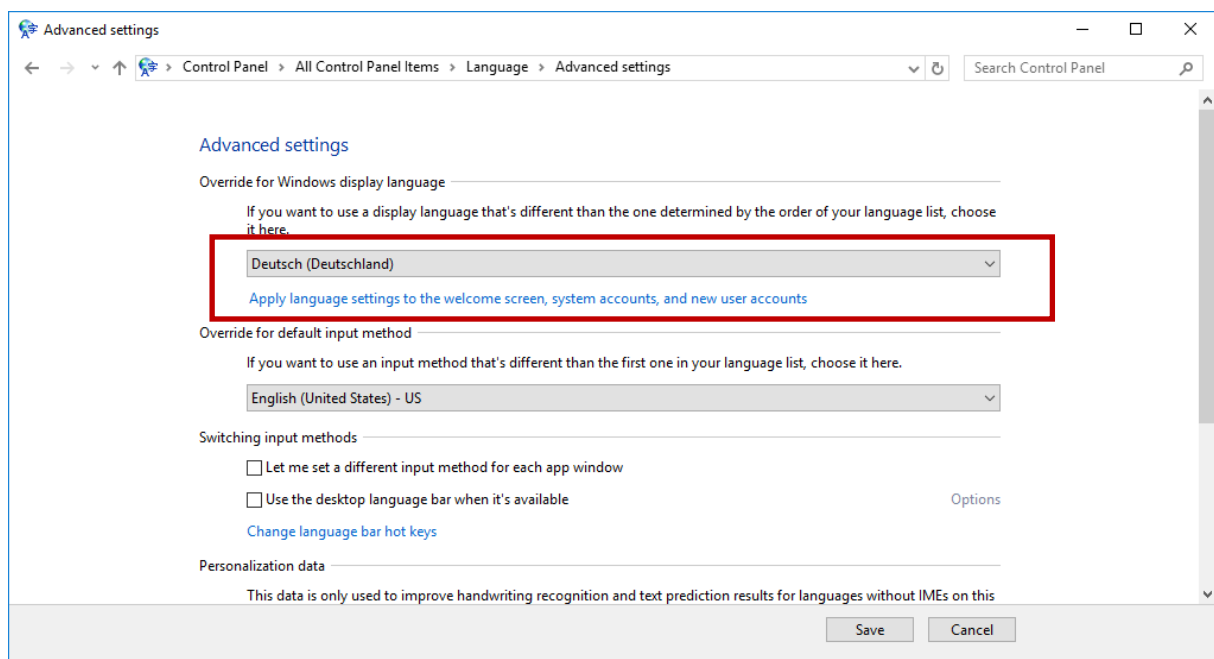

10. Under Clock, Language and Region select **Add a language** or **Language**

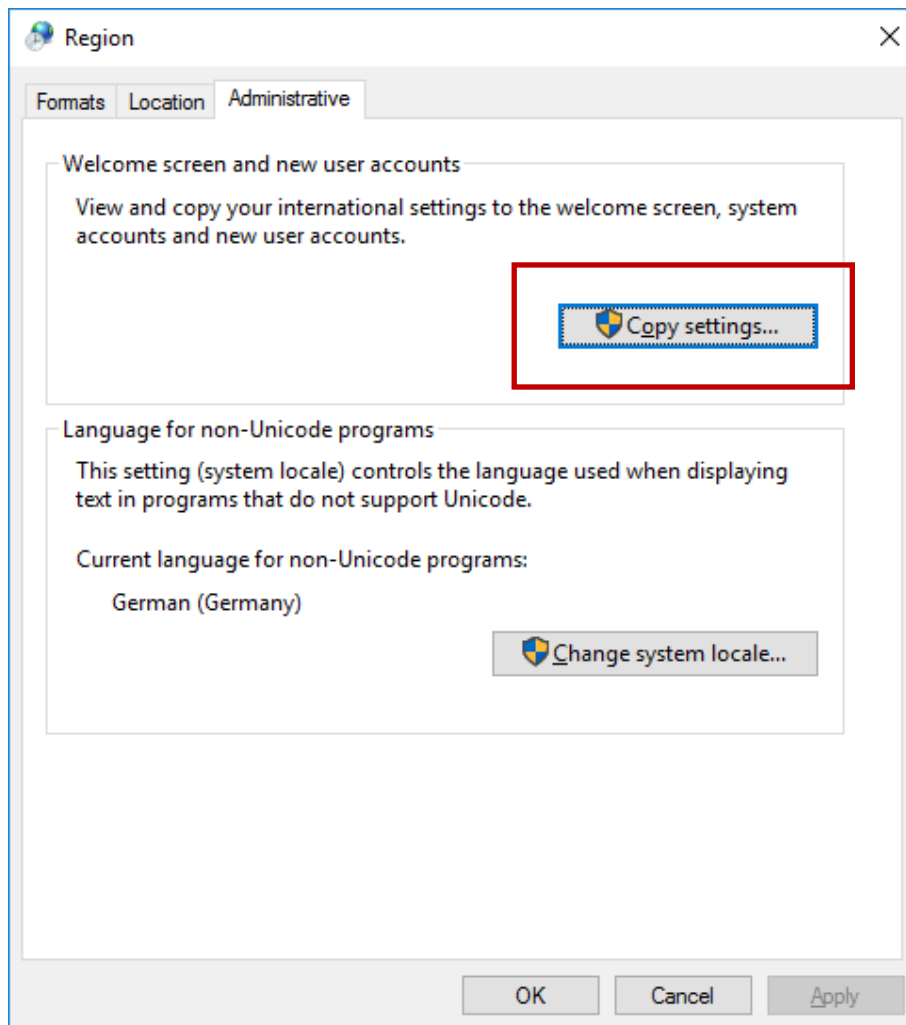

11. Click the **Advanced settings** link in the left pane.

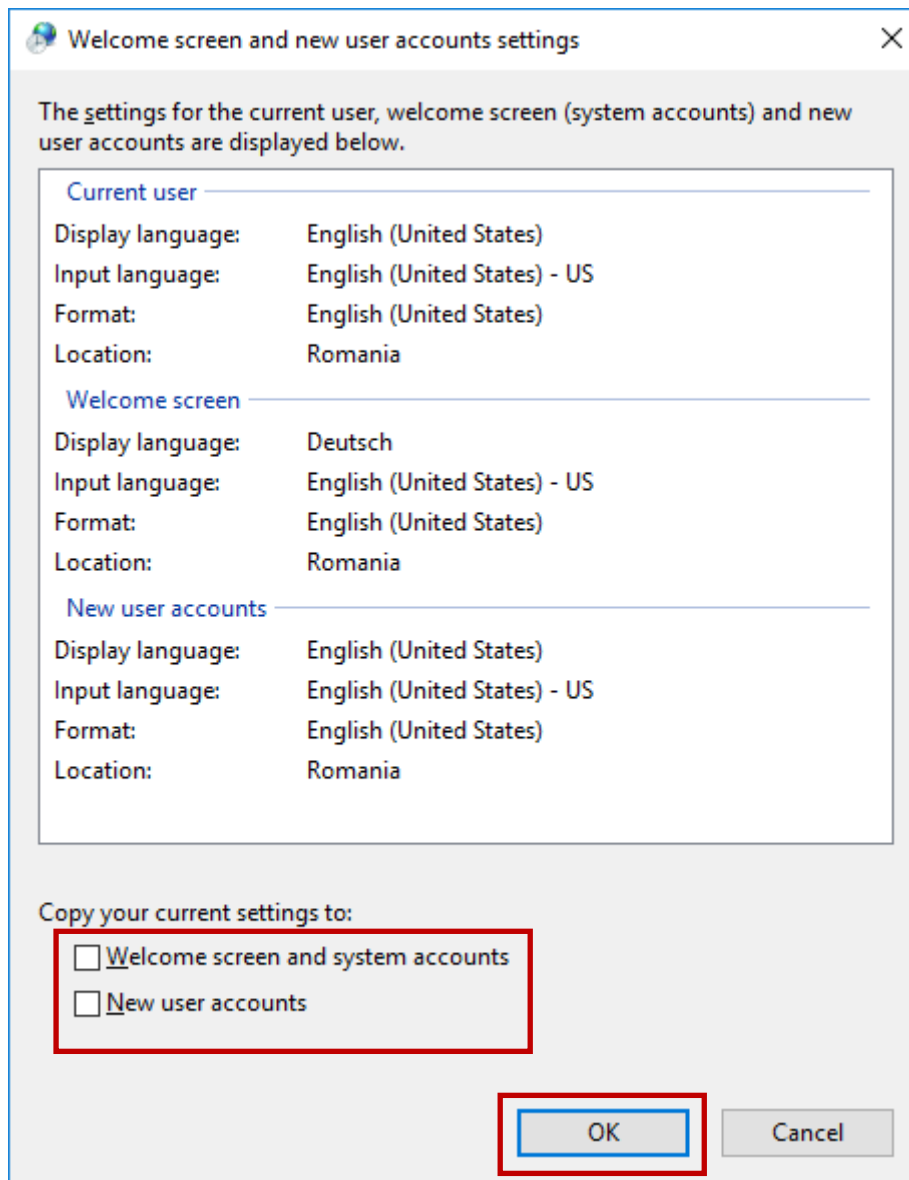

12. Select the language and click the **"Apply language settings to the welcome screen, system accounts, and new user accounts"**

13. On the Administrative tab, under the "**Welcome screen and new user accounts**", click the **Copy settings...** button.

14. Check the **Welcome screen and system accounts** and the **New user accounts** options.

15. Click **OK**.

16. Click **OK** again.

17. Click on **Log off now** to reboot your computer and upon restart, you should see the new default language globally set through the operating system.
